RTTI — Temporary traffic control measures

Introduction to semantic modelling

A **concept scheme** (in SKOS: *ConceptScheme*) is a structured collection of concepts that carry a fixed, shared meaning within a particular domain. The goal is for everyone working with the model — people and systems alike — to use the same words for the same things. That sounds obvious, but in practice language causes a surprising amount of confusion: what one organisation calls a *measurement point*, another calls a *sensor*, a *location*, or an *observation station*.

A concept scheme solves this by recording, for each concept:

- a **preferred label** (prefLabel) it is known by,
- a **definition** that unambiguously describes what the concept does and does not cover,
- and optionally a **scope note** or **example** to clarify borderline cases.

Concepts rarely stand on their own. They are related **hierarchically** (a vehicle is broader than a truck) or **associatively** (a road user relates to a road segment). These relationships make it possible for queries and analyses to navigate between general and specific concepts, and to make connections between concepts explicit. Within SKOS we use `broader`, `narrower`, and `related` for that.

When a concept also exists elsewhere — in a national or European standard, for instance — we record that as a **mapping relation**. This prevents reinventing the wheel: we link to the source so interoperability with external systems remains possible.

This document describes the concept scheme as it is currently recorded. The following sections list the metadata, every concept, the relationships between them, and — where the model is connected to a data source — how it is linked to that source data.

RTTI — Temporary traffic control measures

Description

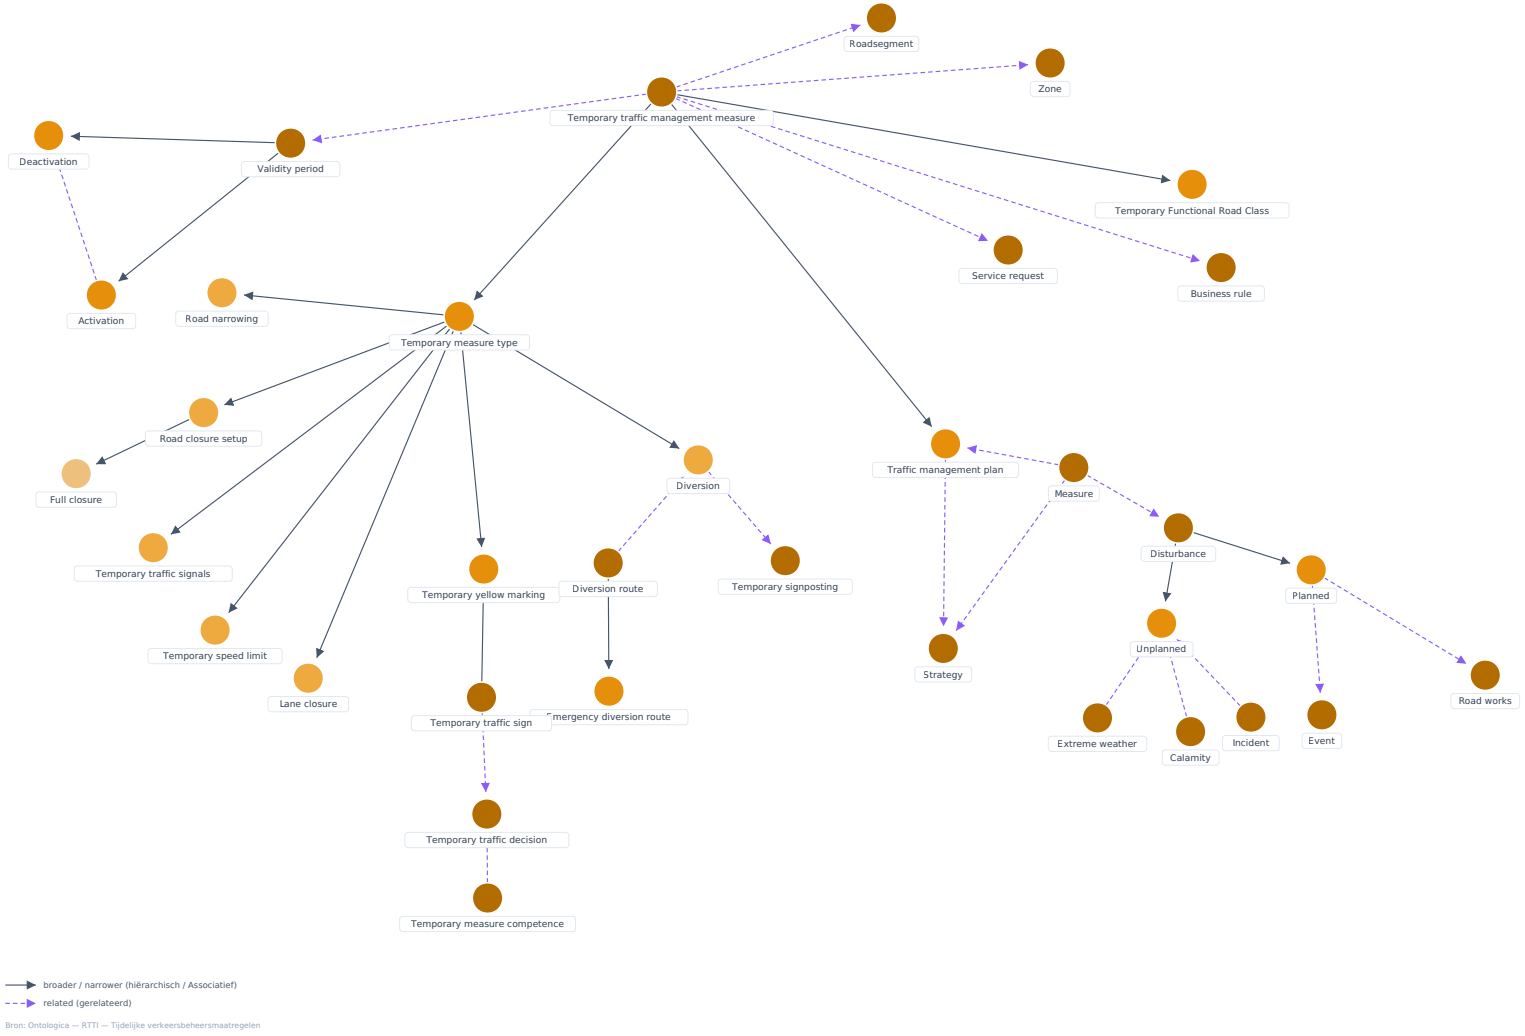

This concept scheme describes the set of temporary traffic management measures taken by or on behalf of the road authority (for a bounded validity period), which is activated for and deactivated after one or more specific triggers or scenarios.

Model overview

Visual overview of the concepts and their relations. Hierarchical relations are drawn with solid arrows; associative relations are drawn with dashed arrows.

Concepts

Temporary traffic management measure

Concept details

Field	Value
Definition	A set of temporary traffic management measures adopted by or on behalf of the road authority (for a limited period of validity), which is activated before and deactivated after one or more specific disruptions.
Scope	Distinguished from a permanent traffic circulation plan by the activation and deactivation characteristic: a temporary measure is deactivated as soon as the triggered scenario has been resolved (NAPCORE data dictionary).
Source	https://eur-lex.europa.eu/eli/reg_del/2022/670/oj, https://napcore.eu/wp-content/uploads/2025/05/DD_2022_670.pdf, https://wetten.overheid.nl/BWBR0004826

Temporary traffic decision

Concept details

Field	Value
Definition	A traffic decision underlying a temporary placement or temporary measure, required where the circumstances last a few months or occur on a regular basis.
Scope	WVW 1994 in conjunction with BABW art. 37: by way of derogation from the main rule, temporary placement and temporary measures are effected pursuant to a traffic decision where the circumstances last longer than four months or occur on a regular basis. Case law (including the Council of State) allows a traffic decision to be waived in the case of urgent circumstances of a passing nature.
Source	https://wetten.overheid.nl/BWBR0004826, https://wetten.overheid.nl/BWBR0006622

Temporary measure competence

Concept details

Field	Value
Definition	The competence of the road authority to place temporary traffic signs or take temporary measures in the case of an urgent circumstance of a passing nature, without an underlying traffic decision.
Scope	BABW art. 34 (urgent circumstance of a passing nature, for the duration of that circumstance) and art. 35 (placement/measure may be effected without a traffic decision).
Source	https://wetten.overheid.nl/BWBR0004826

Temporary traffic sign

Concept details

Field	Value
Definition	A traffic sign that is placed or applied on a temporary basis and is removed or deactivated once the trigger has ended.
Scope	RVV 1990: temporarily placed or applied road surface traffic signs take precedence over other road surface markings applied at that location in so far as these are incompatible (art. 63a).
Source	https://wetten.overheid.nl/BWBR0004825, https://wetten.overheid.nl/BWBR0004826

Road works

Concept details

Field	Value
Definition	Maintenance, construction or repair works on or alongside a road section that wholly or partly affect the use of the road.
Scope	NAPCORE data dictionary: road works generally affect individual lanes; where they affect all lanes, they coincide with road closures. In the Netherlands supported by the NDW DATEX II v3 road works profile.
Source	

Field	Value
	https://docs.ndw.nu/dataformaten/datex2-v3/wwz/, https://napcore.eu/wp-content/uploads/2025/05/DD_2022_670.pdf, https://www.crow.nl/Onderwerpen/Arbo-en-Veiligheid/Werk-in-uitvoering/

Temporary measure type

Concept details

Field	Value
Definition	A category of physical or regulatory intervention by which a traffic measure is implemented with a clear start time and end time.
Scope	Collective concept for closures, lane measures, speed measures and temporary traffic signals, in line with the sub-measures in the NDW DATEX II v3 profile.
Source	https://docs.ndw.nu/dataformaten/datex2-v3/wwz/

Road closure setup

Concept details

Field	Value
Definition	The physical closing off of a work zone or road section using delineation, barrier equipment and markings.
Scope	Elaborated in the CROW work in progress guidelines (96a/96b); terms reusable from the CROW thesaurus.
Source	https://data.crow.nl/thesaurus/, https://www.crow.nl/Onderwerpen/Arbo-en-Veiligheid/Werk-in-uitvoering/

Full closure

Concept details

Field	Value
Definition	The closure of a road section to all traffic, possibly with the exception of emergency services.
Scope	Modelled in the NDW DATEX II v3 profile via RoadOrCarriagewayOrLaneManagement; where the closure affects all lanes it coincides with a road closure (NAPCORE).
Source	https://docs.ndw.nu/dataformaten/datex2-v3/wwz/, https://napcore.eu/wp-content/uploads/2025/05/DD_2022_670.pdf

Lane closure

Concept details

Field	Value
Definition	The temporary closure of one or more lanes while the remaining lanes stay available.
Scope	RTTI data category lane closures (planned/unplanned); in the NDW profile via RoadOrCarriagewayOrLaneManagement.
Source	https://docs.ndw.nu/dataformaten/datex2-v3/wwz/, https://napcore.eu/wp-content/uploads/2025/05/DD_2022_670.pdf

Road narrowing

Concept details

Field	Value
Definition	The temporary narrowing or shifting of the carriageway or lane for the purpose of works or another scenario.
Scope	Part of lane and carriageway management for road works in the NDW DATEX II v3 profile.
Source	https://docs.ndw.nu/dataformaten/datex2-v3/wwz/

Temporary speed limit

Concept details

Field	Value
Definition	A temporarily reduced speed limit imposed during road works or another scenario and lifted once these have ended.
Scope	Recorded in DATEX II as SpeedManagement with speedManagementType speedRestrictionInOperation, a temporarySpeedLimit and complianceOption mandatory (NDW profile). References the speed restrictions model without duplicating it.
Source	https://docs.datex2.eu/, https://docs.ndw.nu/dataformaten/datex2-v3/wwz/

Temporary traffic signals

Concept details

Field	Value
Definition	A temporarily installed traffic signal control installation, for example to regulate traffic past a work zone.
Scope	In the NDW DATEX II v3 profile via GeneralNetworkManagement with generalNetworkManagementType temporaryTrafficLights.
Source	https://docs.ndw.nu/dataformaten/datex2-v3/wwz/

Temporary yellow marking

Concept details

Field	Value
Definition	A marking applied temporarily to the road surface that takes precedence over the permanent white marking.
Scope	RVV 1990 art. 63a governs the precedence of temporary road surface signs; the colour requirement (a colour other than white, in practice yellow) follows from the BABW implementing regulations, Chapter IV, section 1. References the traffic signs model without duplication.
Source	https://wetten.overheid.nl/BWBR0004825, https://wetten.overheid.nl/BWBR0004826

Diversion

Concept details

Field	Value
Definition	The temporary guidance of traffic along an alternative route because of a closure or restriction on the usual route.
Scope	Modelled in DATEX II via ReroutingManagement; in the Netherlands elaborated in the CROW work in progress guidelines.
Source	https://docs.datex2.eu/, https://www.crow.nl/Onderwerpen/Arbo-en-Veiligheid/Werk-in-uitvoering/

Diversion route

Concept details

Field	Value
Definition	The alternative route that traffic follows for as long as the usual route is closed or restricted.
Scope	Part of the diversion design according to the CROW work in progress guidelines.
Source	https://docs.ndw.nu/dataformaten/datex2-v3/wwz/, https://www.crow.nl/Onderwerpen/Arbo-en-Veiligheid/Werk-in-uitvoering/

Temporary signposting

Concept details

Field	Value
Definition	Temporary indications on or next to the existing signposting that indicate the diversion route.
Scope	Designed using yellow diversion signs in accordance with the CROW work in progress guidelines.
Source	https://www.crow.nl/Onderwerpen/Arbo-en-Veiligheid/Werk-in-uitvoering/

Emergency diversion route

Concept details

Field	Value
Definition	A predefined and numbered diversion route (Dutch: U-route) that is opened when a motorway is closed.
Scope	The Dutch U-route system is managed by Rijkswaterstaat and indicated by U-signs.
Source	https://www.crow.nl/Onderwerpen/Arbo-en-Veiligheid/Werk-in-uitvoering/, https://www.rijkswaterstaat.nl/

Disturbance

Concept details

Field	Value
Definition	The event or condition that causes the activation of a set off temporary traffic measures or a strategy.
Scope	Collective concept for the situations that trigger a traffic management plan or a temporary measure (NAPCORE data dictionary).
Source	https://napcore.eu/wp-content/uploads/2025/05/DD_2022_670.pdf

Event

Concept details

Field	Value
Definition	A planned occurrence, such as a sports fixture, market or festival, that requires temporary traffic measures.
Scope	Placed under road works and events in the NDW DATEX II v3 profile.
Source	https://docs.ndw.nu/dataformaten/datex2-v3/wwz/, https://napcore.eu/wp-content/uploads/2025/05/DD_2022_670.pdf

Calamity

Concept details

Field	Value
Definition	An unexpected high-impact event, such as a natural or technological disaster, that requires temporary measures.
Scope	Falls under the scenario-driven measures activated through a traffic management plan (NAPCORE data dictionary).
Source	https://napcore.eu/wp-content/uploads/2025/05/DD_2022_670.pdf

Incident

Concept details

Field	Value
Definition	An unexpected disruption of the traffic flow, such as an accident or a broken-down vehicle.
Scope	RTTI state-of-the-network category; triggers temporary measures and the provision of information.
Source	https://napcore.eu/wp-content/uploads/2025/05/DD_2022_670.pdf

Extreme weather

Concept details

Field	Value
Definition	Weather conditions, such as storm, black ice or snow, that require the activation of a set of temporary traffic measures.
Scope	One of the conditions that can trigger a traffic management plan (NAPCORE data dictionary).
Source	https://napcore.eu/wp-content/uploads/2025/05/DD_2022_670.pdf

Traffic management plan

Concept details

Field	Value
Definition	The collection of strategies, measures and actions that together constitute the plan.
Scope	The traffic management plan is a defined DATEX II data type (TrafficManagementPlan namespace, CEN/TS 16157-8) with the classes Strategy and Measure carrying activation conditions; unlike the traffic circulation plan, which has no DATEX II namespace of its own.
Source	https://docs.datex2.eu/, https://napcore.eu/wp-content/uploads/2025/05/DD_2022_670.pdf

Strategy

Concept details

Field	Value
Definition	A coherent set of measures within a traffic management plan sharing a common activation condition.
Scope	Modelled in DATEX II as Strategy within the TrafficManagementPlan namespace; activation conditions may be composite (v3.6).
Source	https://docs.datex2.eu/

Measure

Concept details

Field	Value
Definition	An individual traffic control measure within a traffic management plan, with its own activation condition.
Scope	Modelled in DATEX II as Measure within the TrafficManagementPlan namespace.

Field	Value
Source	https://docs.datex2.eu/

Validity period

Concept details

Field	Value
Definition	The start and end time within which a temporary traffic measure is in force.
Scope	The characteristic that distinguishes temporary measures from permanent ones; recorded in DATEX II and the NDW profile as the validity period.
Source	https://docs.datex2.eu/, https://napcore.eu/wp-content/uploads/2025/05/DD_2022_670.pdf

Activation

Concept details

Field	Value
Definition	The entry into force of a temporary traffic measure upon occurrence of the trigger.
Scope	In the NDW chain linked to the active reporting of a measure.
Source	https://docs.datex2.eu/, https://docs.ndw.nu/dataformaten/datex2-v3/wwz/

Deactivation

Concept details

Field	Value
Definition	The termination of a temporary traffic measure once the scenario that triggered the measure has been resolved.

Field	Value
Scope	Core distinction between the traffic management plan and the traffic circulation plan according to the NAPCORE data dictionary; in the NDW chain the transition from active to idle status, whereby the associated measures are deactivated.
Source	https://docs.ndw.nu/dataformaten/datex2-v3/wwz/, https://napcore.eu/wp-content/uploads/2025/05/DD_2022_670.pdf

Temporary Functional Road Class

Concept details

Field	Value
Definition	A temporarily assigned functional road class that overrides the normal classification of a road section for as long as a temporary traffic management measure is in force.

Zone

Concept details

Field	Value
Definition	A contiguous geographic area within which a temporary traffic management measure or traffic management plan applies. Unlike a road section, which denotes a linear stretch of road, a zone delimits an areal region to which the relevant measures, rules or conditions apply.

Business rule

Concept details

Field	Value
Definition	Een expliciet vastgelegde regel die bepaalt onder welke condities een tijdelijke verkeersbeheersmaatregel wordt geactiveerd, gewijzigd of gedeactiveerd.

Roadsegment

Concept details

Field	Value
Definition	T.b.d.

Service request

Concept details

Field	Value
Definition	t.b.d.

Planned

Concept details

Field	Value
Definition	A disruption that is known and scheduled in advance.

Unplanned

Concept details

Field	Value
Definition	A disruption that is not scheduled in advance and occurs unexpectedly.

Relations per concept
